Professional Summary

I'm a designer living in Brazil, working at Nubank, one of the biggest banks in Latin America, and I'm constantly trying to make people's lives easier.

With almost 15 years of experience in design, I started in the world of design in the graphic area. That gave me an excellent basis for design principles.

I discovered digital design after a few years and today I focus on people's experience and usability of mobile apps, SaaS dashboards and websites, without leaving the visual aside.
